Dr Gerrit Wyma
4 Reitz Street,
Somerset West 7130
South Africa

19. Dezember 2011

Dear Dr Wyma,

I hope that you are in good health and spirits, and continuing to thrive professionally. Today I am addressing these lines to you in connection with the implant treatment that you have performed on me some years ago.

To recall some details to you, I may mention the following details. My initial consultation with you was towards the end of 1991 in your colleague's practice in Windhoek. You have performed the first phase of the implant treatment early in 1992 at the Medicity Clinic in Windhoek, and the second phase over ten years later - *i. e.*, in about the middle of 2002 - in your own practice in Somerset West (at the time, I was visiting from Japan, where I was then working).

I am writing to you now, as the upper part of the implant that you have given me has recently become loose and needs to be tightened urgently. My dentist here has advised me that it would be easier for him to tighten the upper plant of the implant, if he knows the brand of the implant, as well as any other details of the procedures that you have performed in giving me this implant.

I would therefore be most grateful, if you could be so good to send me this information, as well as any other relevant details pertaining to the procedures that you have performed in giving me this implant, as speedily as possible. This information is needed urgently, so my dentist here has told me, as it will be more complicated to re-affix the upper part of the implant, should it fall out, than just to tighten it, while it is still merely loose.

So, in the circumstances, I would be much indebted to you for a quick response. The contact options for me are shown at the head of this letter and the covering email with which I am sending you a preview of this letter. I can also receive faxes on the number +4932121423922. Further, with the original of this letter I am also sending you a prepared envelope in which you may post any original documents to me later, though the pertinent information should reach me from you if possible today, preferably by email or fax.

. . . thank you very much; Dr Wyma, for your kind assistance. For now I remain with the best regards for the festive season and with friendly greetings.

Yours sincerely
